

COLUMBIA

Columbia 4.6m² is a small log cabin style shed with single window and single half glazed door (both fitted with real glass). This cabin is built from nordic spruce untreated timber 'logs' that have been designed to slot together to build the wall structure and have been designed to allow window and door frames to simply slot into a predetermined position with allowance for movement from settlement of the timber logs. The window opens inwards into the building and the door opens outwards for space saving.
