

MINNESOTA

The Minnesota Log Cabin is a beautiful timber building with thick 70mm tongue and groove walls which allows this building to be great as an office for your business due to the thickness of the logs offering additional insulation and security. The size of the Minnesota would help create a garden studio or lodge. The 70mm thick timbers, which help sound-proof and keep the heat inside, contribute to the practicality of using the Minnesota as real time living space. The Minnesota even makes for an area for dining and entertaining all year-round.
