

**UTAH 2**

The Utah 2 Canopy cabin is a fantastic single tongue and grooved building made from panels. This pent roof building has misted glazing and low door sill covered with stainless steel. With an internal floor space of 6m<sup>2</sup>, this building would make for a great summerhouse or summertime reading room. This model also has a side canopy that allows this building to be used as an outdoor/indoor dining area or hot tub shelter with a changing room.
